SOLUTIONS LIMITED

# Advanced Dynamometer System

CCS Produced all control hardware, transducers, signal conditioning and software for a dynamometer control system. The system has a basic and advanced menu mode. Users can build up complex test procedures quickly allowing brake testing under torque, pressure and speed related pressure feedback modes.

MAIN MENU SCREEN

## MIMIC DISPLAY IN MANUAL MODE

Manual screens (using dual TFT displays) provide informative diagrammatic and tabular views of the whole control system

## CALIBRATION SCREEN

Detailed calibration screens provide full information on analogue and digital channels
